

DMP

Your Data in Safe Hands

Your data is growing rapidly, often by giga- or terabytes per day. At the same time, the need to keep a grip on your data is growing. Data must be stored and managed efficiently, time-saving and securely. How do you stay ahead of the curve? We offer a helping hand to thousands of customers, both local and international organizations.

We do this with:

- 100 trained and certified colleagues in branches in the Netherlands (HQ), Germany, Denmark, Spain and South Africa
- Data centers around the world
- Dedicated partnerships with Commvault, NetApp and Cohesity, among others

Your Data in Safe Hands

Knowledge and expertise of data and data management are our most important assets. Our advisory role provides new insights on a daily basis that we also use for your organization.

Challenges that we already see shining on the horizon ensure a constant innovation of our services and the implementation of new trends. An example of this is our **DataManagement-as-a-Service (DMaaS)** portfolio, with which we make innovative products and services manageable for every type of organization.

We advise, see opportunities and offer solutions. Together we will find a solution that fits your organization, innovation needs and growth. Always in a good balance and with added value. **DMP: Your Data in Safe Hands.**

Data Management oplossingen

Renowned organizations at home and abroad use our services. Our portfolio is built on three pillars:

- **We Store:** reliable, fast and secure primary, backup and cloud storage solutions.
- **We Protect:** solutions for backup, archiving and disaster recovery. On-premises, in the cloud or hybrid.
- **We Manage:** professional advice on data management, analytics and remote management of your data and applications.

We do not offer these solutions on our own. We do this together with our partners. We are the **first and only Commvault Service Advantage Master** in the world. Another pillar of our portfolio is NetApp technology. As a **NetApp Gold Partner** and **Cloud Service Partner**, we are perfectly capable of advising, implementing and offering these products as a service. The same applies to Cohesity, for which we are **Preferred Partner** for the Benelux.
